

COM express type 7 AB connector

Notes -

1. The push-button controller is configured in a way that powers-on when XEE power is available.
2. COM express type 3 can shutdown the XEE PSU via XEE\_HSA signal.
3. XEE3 HSA button HST can shutdown the motherboard using POWER\_CTLHSA signal.
4. PC workstation front panel can shutdown the motherboard via POWER\_CTLHSA signal
5. COM express type 97 can get indication of power-button being pressed by COM\_POWER0 (and thus start a shutdown process)
